FUMETTO IL NOBEL A DINAMITE?!?

LA RESA DEI PKONTI

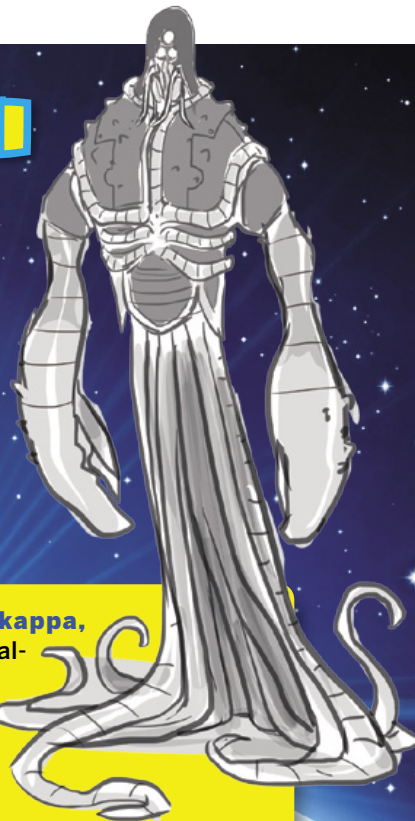

MANCA UN SOLO EPISODIO (SIGH!)
AL TERMINE DI **CRONACA**
DI UN RITORNO. PRIMA DI LEGGERLO,
FACCIAMO INSIEME IL PUNTO
DELLA SITUAZIONE

Tesfo di Davide Catenacci

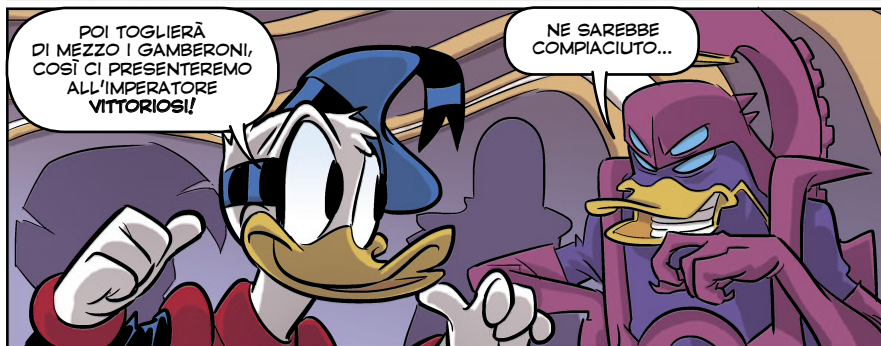

La strategia di **Pikappa**, che consiste nell'allearsi sia con gli evroniani sia con gli **en'tomek** all'insaputa gli uni degli altri, sembra funzionare. È grazie a essa che

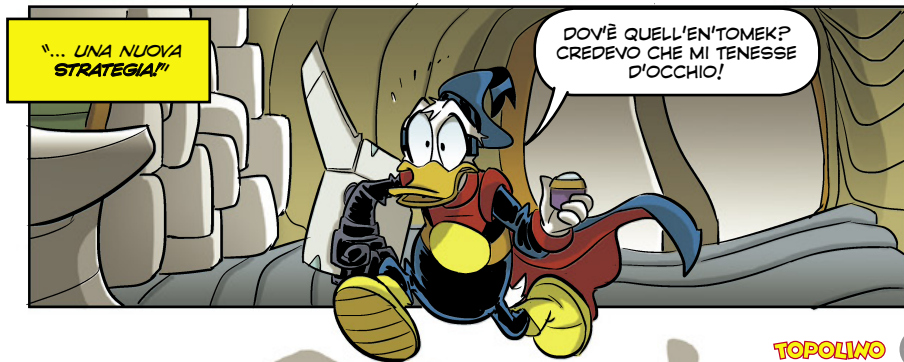

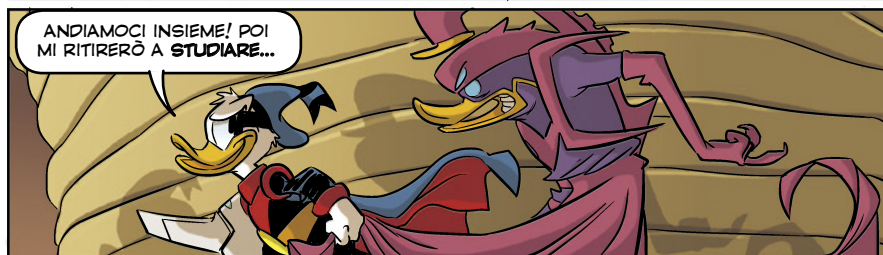

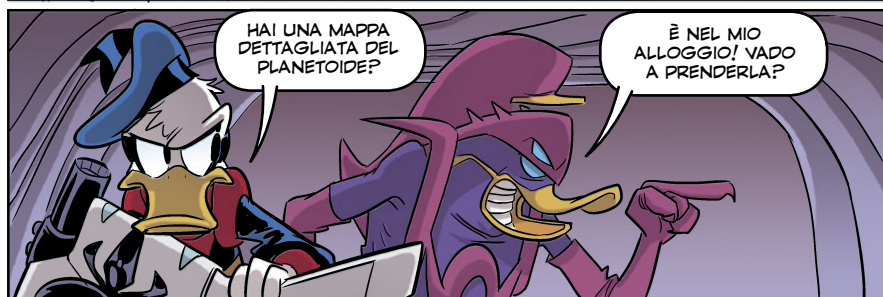

Xadhoom ha ripreso conoscenza dopo un lungo sonno. Tutto bene sul planetoido evroniano, dunque? Niente affatto: la xerbiana ha perso i suoi poteri, gli en'tomek stanno prosciugando l'energia del sole, ed è per questo che la Terra intera è preda del ghiaccio. Inoltre, tra gli evroniani ce n'è uno che sospetta che Pikappa stia facendo il doppio gioco. Uhm... butta male, per il pappero mascherato. 🐔
